

I understand that big business is trying to buy your vote to discontinue limiting the amount of the media that any one source can own. In other words tend to make it a monopoly! Is that like Senator McCain said about Congress dragging their feet on stopping US Corp. from moving their headquarters out of the country to avoid US taxes? When asked why it was so difficult to pass such a law, he said, "Heavy lobbying." Just another way of saying, "All of the soft money (meaning bribes to Congress persons)" are not yet in!

Our application of Democracy by the Federal Government and its Agencies is simply, "Increase our wage, reduce our responsibility and add people to our staff, or better yet, put our responsibility on the States, but do not give them our budgeted money-we earned it. Who needs Bin Laden? Our Federal government is our nation's weapon of self-mass-destruction of our economy! What you do will be no different from what you have been doing all along-whatever pays you the biggest "gift!" These excercises are nothing more than your hypocrisy in saying that you reacted to the public's input.
